

PREDISAN
PROCLAIMING JESUS, HEALING LIVES

2019 ANNUAL REPORT

**EMPOWER.
PROCLAIM.
HEAL.**

OUR MISSION

Predisan Health Ministries (PHM) exists to proclaim Jesus and heal lives as we help people realize their inherent worth and need for wholeness, as God intends.

MESSAGE FROM THE CEO

Dear Friends,

I want to thank you from the bottom of my heart for your support and investment in Predisan. We are looking to the future, and in doing so, we have plans to expand the mission of Predisan as we serve the population. Through our faithfulness in Christ and by his grace, we are positioned to expand our footprint in all of Olancho. This would not be possible without you. With God's lead and provision, we will move forward to empower communities, heal lives and proclaim the name of Jesus.

Amanda Madrid, MD, MPH, PhD
Predisan CEO

EMPOWER

Predisan empowers the community through education, collaboration and faith in God's redemptive plan.

Volunteers brought life and energy; 220 local runners in CEREPA 4K Marathon and 174 international visitors

Partnership with Lipscomb and OCU enabled solar power installation for birthing center and a solar refrigeration system to store vaccines at a remote health center in Culmi

71% of CEREPA patients enjoyed productive functioning 360 days after discharge

'It Is Preventable' Dengue outbreak campaign launched: Raised \$60,095 and treated 2,065 patients in 2019 vs. 86 in 2018.

Meet Julio

"Seeing patients who have recovered at CEREPA or patients being helped in a holistic manner brings so much joy to my heart. I consider that my second salary."

Julio Benitez, 49, is a psychologist who previously served as the Director for CEREPA for 11 years. For the past 8 years, he has influenced the community as a Senior Spiritual Counselor and

chaplain at the Good Samaritan Medical Center and Policlínico.

Julio further shares that, "CEREPA was the school that taught me human reality and kept me awake for countless nights for a specific purpose – to pray for strength and wisdom in how to bring hope and healing to addicts. As mental health professionals, we are not able to do it by ourselves; we must ask the Lord for help as well as our Christian community in Catacamas."

PROCLAIM

Our desire is to see spiritual growth and life change in our staff, volunteers and the communities and individuals we serve. We want to see ourselves and the next generation walking in relationship with God and we do this by providing healing, counseling, teaching and empowering those we serve.

3 Pastoral Community Networks were organized with 59 churches and 74 leaders

The Inter-American Development Bank recognized Predisan's work with the Culmi health network as the best Primary Care Program in Honduras

Implemented a key staff discipleship program: "Predisan 301: Spiritual Disciplines"

Completed 25 projects including improvements to 9 healthcare centers and our communication radio network

Andrea's Story

Many people around the world use drugs and alcohol as an escape from reality. Andrea Espinal is no different. At only 26 years old, she found herself as a college dropout, wasted and addicted to drugs and alcohol. Andrea decided to admit herself to CEREPA and started her journey to rehabilitation. Shortly before completing her 60-day inpatient treatment, Andrea stated "I have realized the truth about

myself, how wrong I was, how mad I had become at myself and my entire life due to the harm I caused myself and others."

Expressing gratitude, she stated that God, Predisan chaplains and therapeutic staff had brought her the understanding of the need to forgive herself. Nine months after her discharge, Andrea was continuing to practice sobriety. She is consistent with her outpatient follow-up, attends AA meetings and holds herself accountable. Andrea now lives with a renewed sense of purpose as CEREPA offered her the opportunity to bring light of Jesus into her darkness. With strength, prayer, love for God and trust in him, Andrea and others like her have been able to transform their lives through CEREPA's impact.

HEAL

Predisan's passion since its founding has been providing medical care to those in great need. Today, our medical work is carried out at health centers in Catacamas, Culmí and the Cuyamel mountains through numerous health initiatives. We will continue to ensure healthy communities in 35 health centers and expand our services at the Good Samaritan Medical Center and the Center for Rehabilitation of Patients with Addictions.

Provided access for 147 women from very remote villages of Culmí to the Maternal Home

20% increase in diagnostic tests improved quality of care at the Good Samaritan Medical Center

Inaugurated the Bacteriology Lab thanks to the Butterfield Memorial Foundation

Predisan was accredited Certified Primary Healthcare Provider, first in the country by the Honduran Ministry of Health

HEAL

Meet Nancy

Thanks to our Health Promotion Network, the life of Nancy Alvarez and her unborn child were saved. Nancy lives in the remote community of Casas Viejas with her husband and four children. Accessibility to a clinic, the birthing center and regional hospital are not easy due to the great distance. Nancy was visited by a health promoter who noticed signs of preeclampsia. He jumped into action, radioed the health center who radioed to the birthing center. Nancy needed to be seen as soon as possible. With the help of the community transport committee, Nancy intersected with the ambulance and was transported three hours to the hospital in Catacamas. By God's grace, doctors were able to not only save Nancy's life but the baby's as well via C-section delivery. Nancy's story is one of many that demonstrates how Predisan's Health Promotion network is instrumental in saving and healing lives.

FINANCIAL SNAPSHOT
